

WA-40

"Wetting Agent"

GENERAL INFORMATION:

WA-40 is an 85% active, water soluble, nonionic and nonfoaming agricultural wetter-spreader, dispersant and penetrant. **WA-40** as a **WETTER-SPREADER** enables the spray drops to wet the foliage and spread out to cover the area of the leaf. As a **DISPERSANT** it aids in the mixing of wettable powders helping to prevent clogging of screens and/or nozzles. **WA-40** has also proven to be a very good **PLANT-PENETRANT**. **WA-40** also works well as a fire-fighting water-wetter. **WA-40** lowers water surface tension to 25 dynes/cm.

INGREDIENTS:

Ethoxylated Alcohols, Glycols and Dimethylpolysiloxane..... 85%
Exempt from tolerance under EPA 40 CFR 180.1001 (c).

DIRECTIONS FOR USE:

Wetter-Spreader 1 pint per 100 gallons
Dispersant 1-2 pints per 100 gallons
Plant-Penetrant 1-4 quarts per 100 gallons
Fire-Fighting 1-2 pints per 1000 gallons

Always follow pesticide manufacturers' recommendations.

CAUTION: CAUSES EYE IRRITATION

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The risks include, but are not limited to damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.

WA - 40 "Wetting Agent"

Supplemental Label

DIRECTIONS FOR USE:

AS A SOIL WETTING AGENT:

Turf--Golf Course Tees, Greens and Fairways

Apply 3 oz. per 1000 sq. ft. early spring then repeat application at 2 oz. per 1000 sq. ft. every 4-6 weeks in sufficient water for good coverage to overcome hydrophobic soil condition.

AS A DEW CONTROL AGENT:

Apply 2 oz. per 1000 sq. ft. of turf area in sufficient water for good coverage.

AS AN INITIAL PEAT and/or BARK MEDIA WETTING AGENT:

Apply 2-7 oz. WA-40 diluted in 2 gallons of water per cubic yard of potting media. Spray as uniformly as possible while the media is blending.

AS AN IRRIGATION WETTING AGENT FOR POTTED PLANTS IN PRODUCTION:

Apply or inject 1-2 oz. WA-40 per 1000 gallons of irrigation water.

Note: WA-40 is compatible with most fertilizers and pesticides. However, always check compatibility of combinations using correct proportions in a jar test.
