

LOCK-DOWN

“Water Conditioner”

GENERAL INFORMATION:

Pesticides and foam concentrates work best in perfect water. LOCK-DOWN is an instantaneous water conditioner. LOCK-DOWN will chelate most multivalent metal ions* instantaneously. *(Fe, Cu, Mn, Ca, Mg, Zn) LOCK-DOWN is an aqueous solution of the tetrasodium salt of ethylenediaminetetraacetic acid. Na₄EDTA is the strongest, most versatile, and widely used chelant for controlling metal ions over a broad pH range in aqueous systems. We are introducing it to the agricultural industry.

INGREDIENTS:

Tetrasodium salt of ethylenediaminetetraacetic acid = 38%

TOTAL active ingredients.....38%

Exempt from tolerance under EPA 40 CFR 180.1001 (d).

DIRECTIONS FOR USE:

4 to 16 ounces per 100 gallons of water

An initial test is required for best results. 1) Fill a clean 2-1/2 gallon jug with water 2 inches below the rim. 2) Test for water hardness with a test strip. 3) Put in 5 cc (1 teaspoon) of LOCK-DOWN. Shake well. Re-test water hardness. 4) If the metal ions are not completely neutralized add 1.25 cc (¼ teaspoon) of LOCK-DOWN at a time testing in between until the test strip indicates complete hard water ion neutralization. Each ¼ teaspoon is equal to 1.67 oz per 100 gallons of water. Call the number below to obtain the test strips.

Always add the correct amount of LOCK-DOWN **BEFORE** adding the pesticides.

CAUTION: CAUSES SEVERE EYE IRRITATION

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The risks include, but are not limited to damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.

NET CONTENTS: 1 Gallon
